Gabe's Construction is pleased to introduce ourselves to you!

Gabe's Construction is a privately held corporation that has been in continuous operation since 1942. Our management team has installed numerous projects using horizontal drilling since the mid-1980's.

Currently Gabe's operates numerous drilling rigs from 10,000 to 660,000 pounds of pullback force, along with necessary support equipment and fleet to handle your next project. Our rigs are capable of pulling in products from 2" to 50" Diameter product up to one mile in length. Gabe's drilling crews have experience with rock or dirt drilling in environmentally sensitive areas.

Please consider Gabe's Construction for your future projects needs.

Please review the following information. If you have additional questions or information needs please contact us.

No matter what type of crossing your project needs Gabe's Const. can deliver! Our past history of completed drills show that we can finish any project. Our depth of directional drilling knowledge comes from management and supervisory staff that has been in the industry since it's inception.
